Variance – APPLICATION FORM

1. Type of Variance

- Area variances provide an increment of relief (normally small) from a physical dimensional restriction such as a building height or setback.
- Use variances permit a landowner to put a property to an otherwise prohibited use. Use variances are prohibited in shoreland zoning.

2. Describe variance request. Attached a sketch if applicable.

Empty text area for describing the variance request and attaching a sketch.

3. To qualify for a variance, an applicant has the burden of proof to demonstrate that they meet all three variance standards

3a. Unnecessary hardship - Unnecessary hardship is present when compliance with the ordinance would do one of two things:

- Unreasonably prevent the owner from using the property for a permitted purpose. For example, if a lot is zoned residential, would complying with the ordinance prevent the lot from being used for a home.
- be unnecessarily burdensome in view of ordinance purposes

Empty text area for describing unnecessary hardship.

3b. Conditions unique to the property Conditions unique to the property such as steep slopes or wetlands must prevent compliance with the ordinance. If an alternative location exists on the property that would not require a variance, this standard is not met. Not every small or steep property meets this standard.

Empty text area for describing conditions unique to the property.

3c. No harm to the public interests A variance granted may not harm public interests. "Public interests" are the purpose and intent of the ordinance that were adopted by the elected officials representing the community.

Empty text area for describing no harm to public interests.
